

BLIND CODING

Event Description: -

Do you have complete faith in your brain and your hand? Can your hands produce what your brain thinks? Well maybe this is the event you have been waiting for. A coding event with a twist Blind Coding is something which will bring out your power of concentration and will.

Team Size: - This is an individual event

Event Timeline and Rules: -

This is a new event introduced in EDGE this year. This is a single round event where the participants will be given a set of questions. The participants can choose any question. But before starting to code the cursor will be placed at the top left corner of editor and then the monitor will be switched off. The participants have to code without looking at the screen. After the participant completes coding the code will be checked for correctness. Each question will have some marks assigned to it. If a participant gets the code correct at first try then he will be awarded the full marks. If not, then we will allow him to take a look at the code and again place the cursor at the top left corner of the screen and turn off the monitor. For each turn the participant gets the code incorrect 5 marks will be deducted from the total marks he can obtain.

In cases of tie the time taken for coding will be considered. And even if there is a tie after that then the most efficient algorithm will be considered to break the tie. Decisions taken by the co-ordinators will be final and binding.
